I have only started reading the 2035 Plan, but I have the following but would like to know how I can review the previous plan online. My comments are: 1) RT should extend the light rail line to Elk Grove (farther than Consumnes River College; 2) extend the light rail line to Roseville. These two extensions should relieve a lot of traffic on I-80, I-5, and 99. The light rail extension to the airport seems like a good idea BUT I would not want to schlep my bags and my wife's bags on a light rail car -- too many bags and too many people.
