I don't own a car and often want to go to the Folsom area on light rail, but there are no trains that come back after 7pm most nights. Also, it may take me an hour to get somewhere with all the transfers, while in a car it could take me 20 minutes. Some of the busses are late, so taking RT is often not an option when one needs to get to work on time. Overall, making public transit accessible to more people and locations, making it efficient and affordable would be the main goal.

Thank you for your consideration.
